DXN Vinaigrette is ***the only vinegar in the world*** made from specially selected Chinese Red Rice, Ganoderma extract and Monascus (rice fermented with Red Yeast). This very special class of vinegar is one of the most renowned premium vinegars in the world. The two-year fermentation ensures its absolute quality with maximum enzymes content.

The health benefits of the enzymes in vinegar are extremely important to the gastro-intestinal tract, as well as the normal functioning of the glandular system. Monascus is the basis for modern cholesterol-lowering drugs, and of course Ganoderma is well known for its own health benefits. The enzymes assist the action of the kidneys in removing acid from the body, and some users with painful joint problems are reporting benefits from using Vinaigrette.

From 15th June through to 31st August, DXN is offering a very special promotion for this excellent and versatile product that can be used in everyday cooking, drizzled over salads or just to drink on its own to help keep your body PH balanced.

AVAILABLE 15th JUNE THROUGH TO 31st AUGUST 2010

Remember! Valid with every purchase in one single Distributor Invoice
