Oxygenates & Revitalises the water
Effectively reduces Fluoride level

Clean and pure

Free from bacteria, heavy metal, toxic chemicals such as chlorine and other contaminants.
Dramatically improves the taste, odor and clarity of water.

Rich with essential Minerals

Minerals are essential in maintaining electrolyte balance in the body,
vital for efficient cell communication (transmitting “electrical messages” in the body)

High dissolved oxygen content

Oxygen content is a measurement of water contamination level. Contaminated water has low oxygen content.
Aquazeon water has high oxygen content.

Molecularly structured in small clusters - Hexagonal Water

Water never exists in a single molecule. Water exists in the form of H^2O^n (n denotes the cluster size). The best form of water that supports life is H^2O_6 , better known as Hexagonal water.

Be energized and alkaline

Energized water is more alive and ‘wetter’. It does a better job of picking up and removing toxic materials from the body, unlike dead water which is disorganized and contains ‘clumps’ of molecules. Energized or ‘structured’ water is like a liquid crystal with much smaller ‘micro-clusters’ of water molecules, making it more like the water in our cells, able to hold minerals and other necessary substances in (colloidal) solution easily. Aquazeon Alkaline water helps to maintain the critical pH balance of our body fluid.

The Aquazeon Energy Water System...

Quality assured, Lab tested and approved by related authorities.
Compact, space-saving design for use on bench-top.
Easy fitting connections - DIY.
No electricity cost. NO water wastage.
